

Easy Run - For Premixed Samples

Cost-Efficient

Most cost-efficient Sanger sequencing service in tubes from Microsynth. For premixed plasmid and PCR samples.

Easy to Use

No sample registration via online portal required.

Environmentally-Friendly

Your sequencing samples are predominantly shipped using environmentally-friendly transport vehicles (train, bicycle).

Overview Easy Run

The Easy Run is the **most cost-efficient** Sanger sequencing service in tubes for routine plasmids and PCR products. It is

only available as a prepaid service and samples must be sent pre-mixed with the desired primer. It is very easy to use

with only 3 steps necessary to get to your results.

*It's
that easy!*

Step 1: Prepare your samples

Step 2: Label your tubes

Step 3: Ship your samples

Your Benefits Include

Up to 1'100 bases read length and more – Fast turnaround time: receive your results the next business day upon sample receipt – **No**

sample registration via our online shop required – Possibility to fine-tune software analysis parameters to achieve your desired performance

– **All results are available for download, chromatograms can be viewed and edited.**

Products

Easy Run (batch of 50 prepaid labels)

New Customer?

Test the sequencing service at no charge!

Email at info@microsynth.seqlab.de

Receive 4 free barcode labels (per research group)

How to Order?

Enter our webshop via www.microsynth.seqlab.de

Click on **"Order Labels"** in the green DNA Sequencing area

Click on **"Easy Run"**. Select the required number of labels
